ENGLISH & WORK PLACEMENT PROGRAMME

English + Work Placement allows students to improve their English skills while also gaining valuable unpaid working experience

One week of English language training and acculturation followed by three weeks of work experience. The length of the course may vary according to student needs.

This course is perfect for students who wish to improve their English levels and also add valuable knowledge and experience to their CV.

Classes are functional and practical so that students will be prepared for the working environment.

Students stay with lovely host families who will provide plenty of spoken language practice.

When students start work, they are expected to behave as a member of staff and learn as much as they can

Key Learning Outcomes:

Every student is assessed prior to course commencement either by Skype or on arrival. This helps us to analyse what the student needs. Together the student and teacher will set the objectives of the course. This could be an improved English level or a new work practice and outlook in employment.

Price:

English: 15 hours @ €225/student
(1 week of English per 3 weeks of work placement)

Training Placement: €150 / student
Accommodation: €220/student/week

ONLINE PROGRAMMES

We are delighted to be able to help students who cannot travel to our school. We can come to you over the Internet!

Students can learn from their home or office. Following an initial Needs Analysis class, students arrange to have Skype classes at a time that suits them. The teacher is real! Your class will be real! Your class is in real time. We will assess your needs and design a programme of class that will help you improve, especially in the areas that you need. You will also receive homework and a final report with recommendations on how to proceed.

Key Learning Outcomes:

The student and teacher set the outcomes together. As classes are designed around the specific needs of the students the Learning Outcomes vary. For example, if students wish to concentrate on speaking skills, we will set objectives based on this skill.
